SURVEY OF WEEKLY EARNINGS AND HOURS - OCTOBER 1969General

1. Sample surveys in respect of most private employers subject to pay-roll tax (i.e. those paying more than \$400 per week in wages and salaries) have been conducted as at the last pay-period in October during recent years. Results of the 1969 survey with comparisons with some of the earlier surveys are contained herein. A copy of the basic form used in the 1969 survey is shown on page 5. Definitions and instructions used in the survey are shown in paragraphs 14 to 26 below.

2. In addition to obtaining data for the calculation of average weekly earnings, average weekly hours paid for, and average hourly earnings, information on overtime and ordinary time earnings and hours for full-time employees (other than managerial, etc. staff) was obtained from the surveys beginning with October 1966 survey. The figures of average overtime earnings and average overtime hours are the averages for all employees (in the specified category) represented in the survey whether or not they worked overtime. The survey figures do not show the average overtime earnings or hours of only those employees who worked overtime.

3. Figures of average weekly earnings, average weekly hours paid for, and average hourly earnings as at the selected pay-periods are presented for males and females (adult and junior) separately by industry groups and by States. They reflect the effects of differences (and of changes between points of time) in amounts paid for the various occupations; in amounts paid for the same occupations; in occupational structures within industries; in industry structure; in degrees of business activity (incidence of overtime, etc.); and in the incidence of incentive schemes, piece-work and profit-sharing scheme payments, etc.

4. In general, where an establishment was closed down for part or whole of the last pay-period in October, or operations were seriously curtailed by an industrial dispute, breakdown, fire, etc., the employer was asked to supply particulars of wages and hours for the nearest normal pay-period.

Coverage

5. The results of the surveys are based on returns from stratified random samples of private employers subject to pay-roll tax. Employees in rural industry and in private domestic service are excluded because most employers in these two industries are not subject to pay-roll tax. Also excluded from the surveys are: employees of government and semi-government authorities; employees of religious, benevolent and other similar organisations exempt from pay-roll tax; and all employees in the Northern Territory and the Australian Capital Territory. The earnings and hours of waterside workers employed on a casual basis are excluded because they are subject to wide fluctuations for short periods such as those covered by these surveys. Waterside workers on weekly hire employed under the new permanent employment scheme are included in the surveys.

6. Approximately 4,600 employers were included in the October 1969 survey and the sample represented 1,710,000 male and 761,000 female wage and salary earners.

7. As the survey was based on a sample, the resultant estimates are subject to sampling variability, that is, variations which might occur by chance because only a sample of employers was surveyed. The extent of the detail published has been determined after considering estimated measures of sampling variability.

Comparability of results

8. In addition to affecting the results of each sample survey, sampling variability also effects comparison between each year's results.

9. The industry classification adopted for the 1969 and previous earnings and hours surveys from 1963 onwards (including the 1965 survey) is that used for the 1961 and 1966 Population Censuses. Because the October 1962 survey was based on a different industry classification only broad comparison with more recent surveys is possible (see Tables 20, 21 and 24). Detailed comparison of the results of the surveys of 1963 to 1969, (excluding 1965) are shown in Tables 11 to 19.

10. The October 1965 Survey of Weekly Earnings was a special purpose survey on a different basis to the surveys compared in this bulletin and, therefore, its results are not shown herein. That survey was restricted to weekly earnings of full-time adult male employees only, and did not cover all the industry groups included in the 1969 and earlier surveys. In addition there were some differences in the treatment of certain categories of employees although this was probably minor in effect in relation to full-time employees. Results of the 1965 survey were published in Labour Report No. 53, 1967.

11. The allocation of employees between "Managerial, executive, professional and higher supervisory staff" and "All other full-time employees" (as defined) depends upon the employers' interpretation of the definitions (see para. 20).

12. In the surveys of October 1962, 1963 and 1964, employees "whose hours of work were not known" were reported with managerial, etc. staff. Beginning with the October 1966 survey, employers were asked to report these employees in their correct classification, and if necessary estimate their hours of work. It is considered that any reporting differences will have had only a slight effect on comparability of the surveys.

13. For some comparative purposes it will be useful to bear in mind that the full effect of the October 1968 general award wage increases of \$1.35 a week is unlikely to have been reflected in wages and salaries paid during the last pay-period in October 1968. These increases operated as from the beginning of the first pay-period commencing on or after 25 October 1968 in the case of awards etc. of the Commonwealth Conciliation and Arbitration Commission and of each of the State tribunals except Queensland and South Australia, where the operative date was 28 October 1968.

Definitions

14. The following definitions refer to terms used in the surveys and in the tables in this bulletin.

15. "Employees" refer to male and female employees who received pay for the last pay-period in October.

16. "Adults" include all employees 21 years of age and over and those employees who, although under 21 years of age, are paid at the adult rate for their occupation.

17. "Juniors" are those employees under 21 years of age who are not paid at the adult rate for their occupation.

18. "Full-time employees" are those employees who ordinarily work 30 hours or more a week and who received pay for the last pay-period in October.

Included are "full-time" employees on short-time; "full-time" employees who began or ceased work during the pay-period; and "full-time" employees on paid annual leave, paid sick leave, long service leave and paid holidays taken during the specified pay-period.

19. "Part-time employees" are those employees who ordinarily work less than 30 hours a week and who received pay for the last pay-period in October. Employees on short-time who normally work 30 hours or more a week are classified as full-time employees.

20. "Other than managerial, etc. staff" includes minor supervisory employees, leading hands, clerical and office staff as well as ordinary wages employees. It excludes "Managerial, executive, professional and higher supervisory staff" who were not further defined.

21. "Weekly earnings" refers to gross earnings before taxation and other deductions have been made, for the last pay-period in October. It includes overtime earnings, ordinary time earnings, shift allowances, penalty rates, commission and similar payments; and that part of paid annual leave, paid sick leave, long service leave and paid holidays taken during the specified pay-period. It includes one week's proportion of payments made other than on a weekly basis, e.g. salary paid fortnightly or monthly; paid annual or other leave taken during the specified pay-period; periodical payments under incentive, piecework, profit sharing schemes, etc; commissions; annual or periodical bonuses, etc. Retrospective payments are excluded.

22. "Overtime earnings" refers to that part of gross weekly earnings (as defined above) for hours paid for in excess of award, standard or agreed hours of work. Overtime earnings were not reported for managerial, etc. staff.

23. "Ordinary time earnings" refers to that part of gross weekly earnings (as defined above) for award, standard or agreed hours of work. It includes shift allowances, penalty rates, commissions, bonuses and incentive payments, and that part of paid annual and other leave, which relate to these hours.

24. "Weekly man-hours paid for" refers to the sum of man-hours for which payment was made. It includes overtime hours, ordinary time hours, paid stand-by or reporting time; and that part of paid annual leave, paid sick leave, long service leave and paid holidays taken during the specified pay-period. For employees paid other than weekly, hours are converted to a weekly basis. For employees who began or ceased work, or were absent without pay for any reason during the specified week, only the man-hours actually paid for are included. Where agreed hours of work are less than award hours, man-hours are based on agreed hours. Hours of work were not reported for managerial, etc. staff.

25. "Overtime hours" refers to hours in excess of award, standard or agreed hours of work.

26. "Ordinary time hours" refers to award, standard or agreed hours of work. It includes man-hours of stand-by or reporting time which are part of standard hours of work, and that part of paid annual leave, paid sick leave and long service leave taken during the specified week.

NOTE. The estimated figures of average weekly earnings contained herein are rounded to the nearest 10 cents; those of average weekly hours paid for, to the first decimal place; and those of average hourly earnings to the nearest cent. Any discrepancies between totals and sums of components in tables are due to rounding.

See instructions
